

Fellows

Sybille Krämer

Stadt Wien/IFK_Fellow

Duration of fellowship

01. October 2018 bis 31. January 2019

Sybille Krämer

PROJECT-TITLE

Is being “digitally connected“ a cultural technique? The Janus face of digital literacy in the context of a “Critique of Digital Reason”

PROJECT-DESCRIPTION

The imperialism of writing is far-reaching: The genetic code of life was written out as DNA, and nearly all applications of contemporary digital life are initialized by letters. We are currently experiencing the transition from the alphabetic into digital literacy. But how are both connected? There are significant ambivalences here: The creation of a new intransparency of algorithmic machine interactions operating behind a graphic user interface; the time regime of acceleration, which is incompatible with a biological and socio-cultural order of time; the paradox of mobility-enhancing networks, which reveal themselves to be data traps. This gives rise to the question: Is the “Critique of Digital Reason” as a “digital Enlightenment”, transforming the original Enlightenment, actually necessary? How can Philosophy contribute to this?

CV

Professor of Philosophy at the Free University of Berlin, guest professorships at the Universities of Tokyo, Vienna, Graz, Zurich, Lucerne. Former member of the German Scientific Council as well as the Scientific Panel of the European Research Council (Brussels). Member in the Senate and Main Committee of the German Research Foundation. Sybille Krämer was a Permanent Fellow at the Wissenschaftskolleg zu Berlin and a speaker of the graduate research group "Notational Iconicity". Fellowships at the IFK Vienna (2010), IKKM Weimar (2012), of the research group "Computer Simulation" Lüneburg (2014). Her research topics include: theory of the mind and epistemology, philosophy of language and images, media philosophy and theory.
